

SeaTex® 10

Certificate No: TAE00001JX

Description and application

SeaTex®10 is a low loss flexible halogen free communications coaxial cable especially designed for use on ships, offshore platforms, wet or dry environments as well as indoor and outdoor installations. Its outer jacket is made of SHF2 material which insures high resistance to oils, UV and weathering. SeaTex® 10 provides a long service life in tough environmental conditions. Additionally, its flexibility and small bending radius allows its installation in limited spaces which makes it the ideal solution for marine applications.
